# Working Student (m/f/d) Software and Device Testing

**RESPONSIBILITIES:**

- Support the Software Testing Team in executing and documenting software tests.
- Create, maintain, and execute test cases and test scenarios.
- Analyze test results, track defects, and support issue verification.
- Contribute to test automation and scripting activities where applicable.
- Collaborate with developers and testers to gain insight into software development and testing lifecycles.
- Apply analytical thinking and exploratory testing techniques to identify defects, quality risks, and improvement opportunities.

**REQUIREMENTS:**

- Currently enrolled in a degree program in Computer Science, Software Engineering, Information Technology, or a related field.
- Strong interest in Software Quality Assurance, Testing, and Software Development.
- Basic scripting or programming skills (e.g., Python, Java, JavaScript, VBA, or similar) are an advantage.
- Strong analytical and logical thinking skills with a problem-solving mindset.
- Curious, quality-focused, and motivated to understand how systems work and how they can fail.
- Good communication, teamwork skills, and proficiency in English; German is a plus.

**BURKERT CULTURE:**

In addition to exciting challenges, we offer you a wide range of opportunities, a great deal of creative freedom, and a corporate culture that encourages you to make the most of them.

**Curious?**

Then we look forward to receiving your application via our online application form.
